Art Unit: 3682

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 4c and 46.

Figure 4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The disclosure is objected to because of the following informalities: In paragraph [0045], line 1, "28b" should be changed to --28a--, and in paragraph [0056], lines 3 and 5, it appears as if "4c" should be changed to --4a--.

Appropriate correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3682

Independent claims 1, 13, and 16 are each indefinite due to the parenthetical subject matter. It is unclear whether the limitations found within the parentheses are to be considered in determining the metes and bounds of the claims.

Moreover, each of the independent claims is unclear in the definition of the dimension of the radial gaps. The phrase "being getting at least wider in accordance with increasing a distance from said bearing portion in said rotation axis", is unclear, as is "is getting at least shorter in accordance with increasing a distance from said bearing portion in said rotation axis". The claims and the disclosure should be amended to clarify the language with respect to these dimensions so that the scope of the claims is readily discernable and clear.

Claims 1-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
